24 Lower the filter into the kettle, and engage the bottom hook in the bottom of the spout.
25 Push the top of the filter towards the spout, to force the top hooks under the top of the spout.

**DESCALE REGULARLY**

26 Descale regularly, (at least monthly). Use a descaler suitable for use in plastic products (most products have plastic parts). Follow the instructions on the package of descaler.

Products returned under guarantee with faults due to scale will incur a repair charge.

Your statutory rights are not affected. Documentation, packaging, and product specifications may change without notice.

**CUSTOMER SERVICE**

If you ring, have the Model No. to hand, as we won't be able to help without it. It's on the rating plate (usually underneath the product).

The product isn't user-serviceable. If it isn’t working, read the instructions, check the plug fuse and main fuse/circuit breaker. If it's still not working, consult your retailer.

If that doesn't solve the problem, ring Customer Service for advice.

If they tell you to return the product to us, pack it carefully, include a note with your name, address, day phone number, and what's wrong.

If under guarantee, say where and when purchased, and include proof of purchase (till receipt). Send it to:

Customer Service, Spectrum Brands (UK) Ltd, Fir Street, Failsworth, Manchester M35 0HS
email: service@russellhobbs.com
telephone: 0845 658 9700 (local rate number)

Cleaning and user maintenance shall not be done by children unless they are older than 8 and supervised.

Keep the appliance and cable out of reach of children under 8 years.
- Don’t fill above MAX, or the kettle may spit boiling water.
- Use the kettle only with the stand supplied (and vice versa).
- If the cable is damaged, return the kettle, to avoid hazard.

Don’t put the kettle, stand, cable, or plug in liquid; don’t use the kettle in a bathroom, near water, or outdoors.
1 Keep the kettle, stand, and cable away from the edges of worktops.
2 Unplug the stand when not in use.
3 Don’t use the kettle without fitting the filter.
4 Use the kettle only for heating water.
5 Don’t use it if it’s damaged or malfunctions.

household use only

BEFORE FIRST USE
- Fill to MAX, boil, discard the water, and rinse.

FILLING
1 Put the stand on a stable, level surface.
2 Wind excess cable beneath the stand.
3 Remove the lid.
4 Fill with at least 1 cup of water, but not above MAX.

5 If you want only 1, 2, or 3 cups of water, fill to the 1, 2, or 3 marks inside the kettle.
6 Replace the lid, and press down to lock it.

SWITCHING ON
7 Plug the stand into the wall socket.
8 Put the kettle on the stand.
9 Move the switch to 1.

SWITCHING OFF
10 When it boils, the kettle will switch off.
11 To switch off manually, move the switch to 0, or simply lift the kettle off the stand.

GENERAL
12 Pour slowly and don’t over-tilt the kettle.
13 Don’t tilt the kettle backwards, water might get on to the control area.
14 If this happens, sit the kettle somewhere warm for 12 hours to dry before using it.
15 Don’t worry about moisture on the stand. The steam used to switch the kettle off is condensed and vented under the kettle.
16 Don’t worry about discoloration on the floor of the kettle. It’s due to the bonding of the element to the kettle floor.

USING WITH INSUFFICIENT WATER
17 This will shorten the life of the element. A boil-dry cut-out will switch the kettle off.
18 To avoid cycling on and off, take it off the stand, and leave it to go completely cold.

CARE AND MAINTENANCE
19 Unplug the stand, and let the kettle cool.
20 Wipe inside and outside with a damp cloth.
21 Grip the top of the filter, and push it down and into the kettle to release it.
22 Lift or tip it out of the kettle.
23 Rinse the filter under a running tap while brushing with a soft brush.
