Approved list of Pharmacies supplying:

Emergency Hormonal Contraception valid from 1st October 2015

If you have had unprotected sex (no condom), or your normal contraception fails (e.g. split a condom, been sick after taking your contraceptive pill): emergency contraception (EHC, ‘morning after pills’) help prevent unwanted pregnancy. EHC can be taken up to 72 hours after unprotected sex. The sooner it is taken the more effective it is:

- Within the first 24 hours after unprotected sex it is 95% effective.
- Within 48 hours it is 85% effective.
- Within 72 hours it is 58% effective.

Act quickly! Drop in, or call ahead to check the pharmacist is on duty and will be able to supply EHC. You can also get EHC from your GP or www.sexualhealthoxfordshire.nhs.uk. Say it is an emergency and you need Emergency Hormonal Contraception.

Please always try and phone before you visit the pharmacies for emergency contraception just to make sure there is a suitably trained pharmacist available.
