

Teacher Resource Pack

Thank you for downloading the Unsung Heroes of Science Teacher Resource Pack. We love the videos that have been made for the 'Unsung Heroes of Science' competition and we hope you and your students enjoy exploring them too!

We've tried to put together a selection of resources to suit different classrooms and opportunities. If you think there's something else that would be useful, let us know and we'd be happy to put more resources together.

The videos are all two minutes long and were selected from those submitted as part of the 'Unsung Heroes of Science' video competition. Each team of two or three 16-18-year-olds put together a two-minute video about their chosen unsung hero of science.

You can find the videos at <https://www.hertford.ox.ac.uk/unsungscience/videos> and on Hertford College's YouTube channel:

https://www.youtube.com/channel/UCPolx90fwUNb_NsLLKvFB-g

The videos were created with Year 8 (12-13-year-old) students in mind, but you may find them and the resources suitable for other ages too. (We certainly learnt a lot by watching the videos!)

The resources in this pack are:

- 10-minute class activity: Science in Context
 - Plan
 - Question worksheet
 - Slides
- 10-minute class activity: Watching Critically
 - Plan
 - Question worksheet
 - Slides
- Full lesson plan: Science in Context
 - Plan
 - Slides

Happy exploring!
