

Hertford Wi-Fi pre-registration

It is recommended that students pre-register for access to the Hertford wireless network ahead of your arrival. Upon completion of your registration, you will be provided with a code which will allow you to connect to the Hertford wireless network.

Before proceeding, you **must** have activated your University of Oxford Single Sign-On (SSO) account.

The below steps should be performed once **per person**, **NOT** once per device – wireless codes can be used on an unlimited number of devices owned by the SSO account holder.

A wireless code is for the exclusive use of the SSO account holder who created it; **you must not share your code**.

1. From any device on any network, visit <https://wifi.hertford.ox.ac.uk> or scan the QR code:

2. Agree to the terms and conditions by ticking the check box, then press **Start**.

3. Choose the **Wireless** option.

4. When prompted, sign in using your SSO credentials.

5. You will be issued a code for wireless network access – this will appear on screen and be e-mailed to you.

6. When you arrive at a Hertford site, connect to the wireless network named **Hertford** using the code you were issued.

Codes generated in this manner are valid for **one year** of access; you will need to follow this process again in a year's time.
